PART VI.

Bills introduced in the Council of State and Legislative Assembly, Reports of Select Committees presented to the Council and Assembly, and Bills published under Rule 18 of the Indian Legislative Rules.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Legislative Assembly on the 27th March, 1923 :—

No. 15 of 1923.

A Bill further to amend the Indian Limitation Act, 1908.

WHEREAS it is expedient further to amend the Indian Limitation Act, 1908; It is hereby enacted as follows :— IX of 1908.

Short title. **1.** This Act may be called the Indian Limitation (Amendment) Act, 192 .

Amendment of section 19, Act IX of 1908. **2.** In section 19 of the Indian Limitation Act, 1908 (hereinafter referred to as the said Act), the following amendments shall be made, namely :— IX of 1908.

(*a*) In sub-section (*1*), for the words "an acknowledgment" the words "a clear and unconditional acknowledgment" shall be substituted, and for the words "signed by" the words "signed and dated by" shall be substituted ;

(*b*) sub-section (*2*) shall be omitted ;

(*c*) Explanation I shall be omitted ; and

(*d*) for Explanation II the following shall be substituted, namely :—

"*Explanation II.*—For the purposes of this section 'signed' means signed either personally or by an agent duly authorised in writing in this behalf."

Amendment of section 20, Act IX of 1908

3. (*a*) For sub-section (*1*) of section 20 of the said Act, the following shall be substituted, namely :—

"where anything is paid either as interest or part of the principal of a debt or legacy before the prescribed period by the debtor or by his agent duly authorised in writing in this behalf, the entry as to such payment being signed and dated by the payer, a fresh period of limitation shall be computed from the date of payment."

(*b*) Sub-section (*2*) of the same section shall be omitted.

Amendment of section 21, Act IX of 1908.

4. In sub-section (*1*) of section 21 of the said Act, after the word "authorised" wherever it occurs, the words "in writing" shall be inserted.

STATEMENT OF OBJECTS AND REASONS.

The object of the proposed amendment is to decrease litigation, perjury, forgery and fraud. At present many facts are required to be proved by oral evidence which the Courts may or may not believe and the result is always uncertain.

Under the proposed amendment, a clear and unconditional acknowledgment duly signed and dated by the person liable or by his agent duly authorized in writing will be required to extend time. Debtors should not be taken by surprise by an ambiguous or undated writing which might be used to extend the period of limitation.

In section 20, there is always a dispute whether the payment was made on account of interest as such. Under the amended section, part payment of principal and payment of interest have been placed on equal footing. Similar amendment has been made in section 21. Authority of an agent to extend time under any of the sections referred to in this Bill must always be in writing and not oral.

I hope the proposed amendments, if passed into law, will considerably reduce litigation and the multiplicity of witnesses will be avoided.

II. Capital and Income.—At the end of the year the capital of the Institution amounted to Rs. 10,46,200 in 3½ per cent. stock-certificate of the year 1865, and in addition temporary investment from savings stood at Rs. 23,200, as in the previous year, of which Rs. 13,200 was in Government securities and the balance, Rs. 10,000, in a Treasury Bill. The annual interest is Rs. 37,079, which is banked with the Imperial Bank of India. The year opened with a cash balance of Rs. 20,940-8-5 and closed with one of Rs. 20,652-3-6.

III. Election to Vacancies, etc.—(1) The annual election of wards was held on Friday, the 20th January. For the 15 vacancies advertised 52 applications were received, but as it was found that funds would permit of a larger number of wards being elected, 22 girls were elected on the recommendation of a sub-committee consisting of the Rev. J. Godber, the Rev. T. Vander Schueren, S.J., the Rev. A. Lincon Shute, D.D., and Mr. Maurice Remfry. Of the girls elected, 12 were placed in the Loreto Convent, Entally (5 in the 1st, and 7 in the 2nd, Boarding School), 2 in the Loreto Convent, Asansol, 3 in the Calcutta Girls' High School, 1 in the Pratt Memorial School, 1 in St. Paul's Mission School and 1 in Dow Hill School, Kurseong. Two girls did not join.

(2) Of the 19 girls withdrawn during the year, 11 had attained the age of 17, the limit ordinary allowed under the rules, and 8 were withdrawn for other reasons.

(3) Of the girls who had been withdrawn during the preceding year, and in respect of whom reports have been received during the year under review, one is employed as a telephone girl and one as a typist in private firms, another after finishing her course in shorthand and typewriting has taken up a post at the Methodist Mission in Rajputana. Three have completed their course in shorthand and typewriting, and are trying for appointments. One is a teacher at a School in Calcutta, and one has joined the Dow Hill Training College, Kurseong.

(4) At the close of the year there were 83 wards on the rolls against 82 in the previous year. They were distributed as follows :—

Loreto Convent, Entally	1st Boarding 20 2nd Boarding 22	...	42
ditto Asansol	...	...	7
St. Mary's Convent, Naini Tal	...	...	3
Calcutta Girls' High School	...	...	11
Pratt Memorial School ...	...	...	7
LaMartiniere for Girls ...	...	...	1
Calcutta Free School ...	...	...	6
St. Paul's Mission Home ...	...	...	4
Stewart School, Cuttack ..	...	...	1
Dow Hill School, Kurseong	...	...	1
	Total	...	83

(5) The following table affords particulars as to the class and religion of the wards at the close of the year :—

Class.	Roman Catholics.	Church of England.	Non-Conformists.	Total.
1. Orphans, or deserted by their parents ...	6	4	2	12
2. Fatherless or motherless, or deserted by their fathers or mothers	38	13	5	56
3. Those who have both parents alive ...	7	3	5	15
Total ...	51	20	12	83

(6) The health of the wards were generally satisfactory. There were no deaths.

IV. Education and Maintenance.—(1) The nature of the education given to the wards was that prescribed for Higher Grade Schools under the Code of Regulations for Europeans Schools in Bengal, and in a few cases, for Secondary Schools.

(2) The Governors are anxious that their wards should not be allowed to drift until they leave school, and have accordingly asked the Visiting-Governor to report, in consultation with the School Authorities, and the girls themselves who have, or are about to attain the age of 15, some definite proposals where this seems desirable, so that the last two years of their school-life may be spent to the best advantage and be a preparation for earning a living.

(3) Two wards were sent up for the Senior Cambridge Local Examination held in December 1921, and one passed. Two were sent up for the Junior Cambridge, and one passed. One was sent up for the Elementary School Certificate Examination and one for the Commercial Course Examination, and both passed. Several wards appeared at the Cambridge Local Examinations held in December 1922; the results are not yet known.

(4) Under the rules a girl is not ordinarily allowed to remain on the Fund after the age of 17, when an outfit of Rs. 100 is generally given on application, to enable her to make a start in life. In cases where wards wish to be trained as teachers and have the support of the school authorities, or where some other special training is recommended, or they are preparing for higher examinations, some extension of the period of benefit is generally allowed. One ward was granted a year's extension to enable her to sit for the Senior Cambridge Local Examination. Two were granted extensions for two years each and one for one year, to enable them to undergo a Commercial Course.

(5) The monthly average cost for the education and maintenance of each ward amounted to Rs. 25-2 against Rs. 25-12-6 in the preceding year.

(6) The amounts paid under the different heads of expenditure were as noted below :—

V. Inspection.—Mr. W. F. Papworth was appointed visiting governor for the first half, and Mrs. J. H. Rundlett for the second half, of the year. They visited all the schools in Calcutta in which there were Bruce wards, and saw each ward. On their recommendation certain wards were allowed to take up a commercial course in place of the ordinary school course. Mr. Papworth reported that the general health of the wards was good and that the children appeared well cared for, neat and cheerful. He strongly urged that no girl be allowed to receive a secondary education unless her school record in the primary section (*i.e.*, up to and including standard IV) clearly indicated that she was worth it, and that care should be taken to see that no girl received the type of education for which she was obviously unfitted.

VI. Meetings.—Four meetings were held during the year, and among the various resolutions passed the following may be recorded :—

(*a*) That a girl on election should ordinarily be sent to an Elementary School whether not at school or already in a Secondary School.

(*b*) That a girl on election may, for good reason shewn, be permitted to join a secondary school if the mother or any one else pays the extra fee, or if the school is prepared to accept her for the Elementary School allowance.

(*c*) That for a girl joining a Secondary School, the Governors should not pay more than the Elementary School allowance while she is in the lower or non-secondary classes.

(*d*) That for girls in Secondary Schools in classes beyond Standard IV, payment should always be made at the secondary rate.

(*e*) That arrangements should be made to remove promising girls from Elementary to Secondary, and unpromising girls from Secondary to Elementary Schools after Standard IV.

(*f*) That wards should not be restricted to Schools in Bengal.

(*g*) That for wards ordered to the hills by medical authority, the extra expenditure necessary may be regarded as a fair charge upon the funds of the Institution, and that this expenditure be continued until the end of the school year in which it is certified that they are fit to return to their original schools.

That for a Bruce ward transferred, with the consent of the Governors, from a higher grade to a secondary school, or *vice versa*, a second outfit grant of Rs. 50 may be paid to the receiving school. No second outfit grant shall otherwise be given.

RESOLUTION ON THE REPORT OF THE WATER-HYACINTH COMMITTEE, BENGAL.

GOVERNMENT OF BENGAL.

DEPARTMENT OF AGRICULTURE AND INDUSTRIES.

DARJEELING, THE 16TH APRIL 1923.

RESOLUTION—No. 41T.-A.I.

Minister in charge : The Hon'ble Nawab Saiyid Nawab Ali Chaudhuri, Khan Bahadur, C.I.E.

IN pursuance of a resolution carried at a meeting of the Bengal Legislative Council the Government of Bengal in June 1921 appointed a committee to enquire into the spread of the water hyacinth in Bengal and to suggest measures for its eradication. The committee have submitted a report in which they have not been able to come to a unanimous conclusion on the important question of the measures to be taken for the eradication of the pest, but they have unanimously recommended that an investigation be undertaken in the first instance into the life history of the water hyacinth and its mode of propagation, and later on into practical methods of checking its growth and the possibility of its economic utilization. Pending further investigation, the committee recommend the encouragement of the collection of the hyacinth and its destruction by fire as the only means of immediate amelioration of the situation created by the pest. They are also of opinion that concerted action, which should be secured by legislation, is necessary. The Government of Bengal (Ministry of Agriculture and Public Works) regret that the committee's lack of unanimity renders it very difficult to decide on the most desirable action to be taken. They agree with the committee that concerted action is necessary for the eradication of the pest and that, until some chemical method of effectively combating it is evolved, its collection and destruction by fire is the most practical way of dealing with it. They will also consider the question of legislation, and they are enquiring from the Government of Burma about the results obtained from the operation of the Burma Water Hyacinth Act, 1917 (1 of 1917). The Government of Assam are also being invited to co-operate with this Government in any measures, legislative or experimental, which it may be decided to adopt. The Hon'ble Minister is also impressed with the necessity for the whole-hearted co-operation of the public in any measure of mechanical eradication of the water hyacinth which may serve even as a temporary palliative. The local bodies and municipalities and the Eastern Bengal and Assam-Bengal Railway authorities have in the past interested themselves in measures for dealing with the pest, but owing to the lack of concerted action their efforts have not so far been productive of encouraging results. The Government of Bengal (Ministry of Agriculture and Public Works) hope to win their co-operation in such measures as they may now take.

2. The committee were not unanimous about the efficacy of the spray, demonstrations of which were given by its inventor, Mr. T. S. Griffiths. Sir Jagadish Chandra Bose and some members of the committee hold that the demonstrations were inconclusive. The experiments conducted on a small scale at Dacca under the supervision of the Imperial Mycologist and Economic Botanist to the Government of Bengal do, however, afford grounds for the belief that the fluid used by Mr. Griffiths, although harmless to human

beings and animals, results on application in the destruction of the water hyacinth.

Steps have accordingly been taken to communicate with Mr. Griffiths to ascertain the terms on which he would be prepared to undertake an extensive demonstration of the efficacy of his spray during the current year.

3. The Minister in charge desires to convey his thanks to the President and members of the committee for the trouble and care with which they investigated the question at so much personal inconvenience and sacrifice.

By order of the Government of Bengal
(Ministry of Agriculture and Public Works),

J. T. DONOVAN,
Secretary to the Government of Bengal (*offg.*).

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 18th April 1923.

Summary.—During the week the rainfall was generally moderate to heavy in the eastern and some northern districts; elsewhere the fall was light and scattered. Ploughing for and sowing of jute and paddy are in full swing. But more rain is needed for the operations in the western and northern districts. Prospects of summer rice and other standing crops are generally good. The average price of common rice for the province has fallen by about 0·09 per cent. as compared with that of the previous week. The total number of persons employed in test relief works in parts of Rajshahi district from the 1st to 15th instant was 829.

NOTIFICATION.

No. 41Marine.—The 23rd April 1923.—The following draft of rules to regulate the granting of certificates of competency to engineers (including motor engineers), under the Indian Steamships Act, 1884 (VII of 1884), which the Governor in Council proposes to make in exercise of the power conferred by section 36 of that Act, and in supersession of the rules published under notification No. 32 Marine, dated the 25th March 1918, as amended by subsequent notifications, is published for general information.

2. The draft will be taken into consideration on or after the 24th May 1923, and any suggestions or objections with regard thereto which are received by the undersigned before that date will be duly considered.

A. MARR,
Secretary to the Government of Bengal.

Draft Rules.

CHAPTER I.—*General Rules.*

1. **Certificates of Competency granted to persons who pass requisite Examinations.**—Certificates of Competency will be granted to those persons who pass the requisite examinations and otherwise comply with the requisite conditions. For this purpose Examiners have been appointed and arrangements have been made for holding the examinations whenever necessary at the port of Calcutta.

2. **Former Enemy Aliens.**—No "former enemy alien" may be examined for a certificate of competency of any grade.

The expression "former enemy alien" means an alien who is a subject or citizen of the German Empire or any component State thereof or of Austria, Hungary, Bulgaria or Turkey, or who, having at any time been such subject or citizen, has not changed his allegiance as the result of the recognition of new States or territorial rearrangements or been naturalised in any other foreign State or in any British Possession in accordance with the laws thereof, and when actually resident therein, and does not retain according to the law of his State of origin the nationality of that State.

3. **Examination of Aliens.**—No alien may be examined for a Certificate of Competency as First Class Engineer unless he has acted as Chief Engineer of a British ship at some time during the War, and is certified by the Admiralty to have performed good and faithful service in that capacity.

4. **Certificates.**—The term "Certificate" in these Regulations means a Certificate issued by the Board of Trade, or by a British Possession under Order in Council, in accordance with Section 102 of the Merchant Shipping Act, 1894. A list of the Colonial Certificates issued under Order in Council is given in Appendix I and the holder of a Certificate so issued must not be examined in Bengal for a Certificate of the grade already held.

Certificates are designated "Ordinary" or "Motor," according to whether they relate to service in steamships or motor ships.

5. **Value of Certificates.**—Until the 1st January 1924, Ordinary Certificates will entitle the holders to go to sea, in the grades certified, as Engineers of any vessels in the British Mercantile Marine. After that date they will not be available for service in ships propelled by internal combustion engines unless endorsed for the purpose, as provided for in rule 41.

Motor Certificates will entitle the holders to go to sea, in the grades certified, as Engineers of any vessels in the British Mercantile Marine propelled by internal combustion engines using oil, spirit, gas or other similar motive agent; but they are not available for service in steamships unless endorsed for the purpose, as provided for in rule 41.

6. **Colonial Local Certificates.**—The holder of a Colonial Certificate of Competency not granted under the Merchant Shipping Act, or of a Certificate granted after examination on board one of His Majesty's Ships, who wishes to be examined for a Government of Bengal Certificate of the same grade, must prove that he has performed the amount of service required by these regulations for that grade, and complied with the conditions laid down as to testimonials.

All Colonial Certificates of Competency, whether local or issued under Order in Council, must be given up before a further Certificate is issued by the Government of Bengal.

7. **Certificates of Service.**—An officer who has attained the rank of Engineer Lieutenant or Engineer Sub-Lieutenant in His Majesty's Navy, or in the Royal Indian Marine, is entitled without examination, if an Engineer Lieutenant, to a Certificate of Service as First Class Engineer, and, if an Engineer Sub-Lieutenant, to a Certificate of Service as Second Class Engineer. These officers may be examined for Certificates of Competency on the same conditions as Engineers in the Mercantile Marine.

An officer who has attained the rank of Chief Artificer Engineer in His Majesty's Navy is also entitled without examination to a Certificate of Service as Second Class Engineer.

8. **Examination of Engine Room Artificers.**—Artificer Engineers, Chief Engine Room Artificers, Engine Room Artificers, and Mechanicians in the Royal Navy may be examined for Certificates of Competency on the same conditions as Engineers in the Mercantile Marine.

9. **Application by Naval Officers.**—The Lords Commissioners of the Admiralty have directed that applications from officers of the Navy for Certificates of Service, or for permission to be examined for Certificates of Competency, must, in the case of officers on the active list, be made through the Commanding Officer to the Secretary to the Admiralty, and, in the case of officers who are on half-pay or who have retired, direct to the Secretary to the Admiralty, who in either case will forward the applications to the Government of Bengal.

It is not necessary for applications of Chief or other Engine Room Artificers and Mechanicians, who have left the Royal Navy and who desire to be examined for Certificates of Competency as Engineers in the Mercantile Marine, to be forwarded either through their Commanding Officers or through the Admiralty. Men who are still serving in these ratings in the Royal Navy should make their applications through their Commanding Officers.

Artificer Engineers, however, being Warrant Officers, should make their applications in the same manner as that laid down for other officers of the Royal Navy.

10. **Time and Place of Examination.**—The times and places at which examinations are held are those as from time to time notified in the *Calcutta Gazette*.

N.B.—The examination days are liable to occasional alteration.

11. **Application for Examination.**—Every applicant for examination must fill up a form of application (Exn. 3), and pay the appropriate fee, at Port Office, signing the declaration on the form of application in the presence of the Chief Examiner. This must be done at least sufficiently early to ensure the form, properly filled in, together with the applicant's certificate of apprenticeship, testimonials, discharges, etc., being lodged with the Examiner of Engineers not later than the day before the day of examination. At least a week's notice should be given by applicants for Motor Certificates, and these notices must be immediately reported by the Examiners to the Chief Examiner.

The Examiner is, as a rule, responsible for seeing that the applications are in order and that the applicants' qualifications are sufficient, but in special cases, if necessary, before allowing an applicant to sit, he will, after seeing that all the required information is clearly stated in the papers, forward them with his observations to the Shipping Master for the verification of services, or to the Chief Examiner of Engineers for instructions, as the case may require, who will either deal with the case or transmit it to the Government of Bengal for decision.

12. **Inquiries.**—Persons wishing to inquire as to their eligibility for examination must fill up an application form, submit their papers, and pay the appropriate fee in the same way as applicants for examination.

13. **Proof of Nationality.**—Every applicant for a Certificate of Competency of any grade will be required to produce proof of nationality.

Proof of British nationality will, in ordinary circumstances, involve the production of a birth certificate or of a certificate of naturalisation. If an applicant for examination cannot produce such a certificate he should be asked to furnish such documentary evidence of nationality, or of birth and nationality of parents, as he may be able to obtain, and, if necessary, the case should be referred to the Chief Examiner for consideration.

If the applicant is not a British subject he will, as a rule, be able to produce some official document testifying to his nationality. If there is any doubt as to the authenticity of such document, the Examiner should consult the nearest Consular Officer of the nation to which the applicant belongs. If necessary, the case should be remitted to the Chief Examiner for consideration.

14. **Age.**—Should any doubt exist as to the age of an applicant, he will be required to produce a certificate of birth.

15. **Fee must be paid.**—Applicants for examination, and persons inquiring as to their eligibility for examination, will be required to pay the examination fee before any step is taken towards inquiring into their services or testing their qualifications, etc. If any applicant is found not to be qualified, the fee will either be returned to him or placed to his credit until he is qualified.

16. **Payment of Fees, and Penalty for Offering Gratuity.**—The fee for examination must be paid to the Port Officer. If an applicant offers a gratuity to any servant of the Department, he will be regarded as having committed an act of misconduct, and will not be allowed to be examined for twelve months, either at the port where the offence was committed or at any other port.

17. **Table of Fees.**—The following fees, respectively, are payable on each occasion on which an applicant presents himself for examination, either for a Certificate of Competency as Engineer, or for the Endorsement of a Certificate:—

	Rs.	A.	P.
Second Class Engineer's Certificate, or its Endorsement ...	20	0	0
First Class Engineer's Certificate, if the applicant holds a valid and appropriate Second Class Certificate of Competency ...	20	0	0
First Class Engineer's Certificate, if the applicant does not hold a Second Class Certificate as above described	40	0	0
Endorsement of First Class Engineer's Certificate, if the applicant previously held a Second Class Certificate appropriate to the Endorsement desired	20	0	0
Endorsement of First Class Engineer's Certificate, if the applicant had not previously held a Second Class Certificate of this description	40	0	0

18. **Fees not returned on Failure.**—If a candidate fails in his examination no part of the fee he has paid will be returned to him.

19. **Sea Service must be Verified.**—Service which cannot be verified by proper entries in the articles of agreement of the ships in which the applicants have served cannot be counted. In all cases the applicants' names must have been duly entered on the ship's Articles as Engineers in their proper ranks.

In all cases in which certificates of discharge in the home or other trade which have not been officially issued at a Mercantile Marine Office are produced as evidence of any part of an applicant's qualifying service, they should be submitted to the Shipping Master for verification.

20. **Service in Foreign Vessels.**—The testimonials of service of foreign or British Engineers serving in foreign vessels, which cannot be verified by the Shipping Master, must be confirmed either by the Consul of the country to which the ship in which the applicant served belonged, or by some other recognised official authority of that country; or by the testimony of some credible person on the spot, having personal knowledge of the facts required to be established. The production, however, of such proofs will not of necessity be deemed sufficient. Each case must be decided on its merits; and if the sufficiency of the proofs given appears to be at all doubtful, the point must be referred to the Chief Examiner.

21. **Calculation of Service.**—The applicant's service as shown on his discharges should be reckoned by the calendar month, *i.e.*, the time included between any given day in any month and the preceding day of the following month, both inclusive. The number of complete months from the commencement of the period, ascertained in this way, should be computed, after which the number of odd days should be counted. The day on which the agreement commences as well as that on which it terminates should both be included and all odd days should be added together and reckoned at 30 to the month.

22. **Gaps in Service.**—The Examiner should be particularly careful to ascertain that there are no gaps in the applicant's service during which his conduct is not properly accounted for, before he is allowed up for examination.

23. **Testimonials; Workshop Service.**—All applicants will be required to produce, in addition to the official discharge certificates, testimonials as to their workshop service and as to their service at sea. The testimonials as to workshop service must be signed by the employer, and must testify to the applicant's conduct and ability, and state what kind of work he was engaged on (*e.g.*, fitting, erecting, turning, machine work, etc.), and for how long. (*See* rule 42.)

24. **Testimonials; Sea Service.**—It is desirable that the whole of the applicant's sea service should be covered by testimonials certifying to his sobriety, experience, ability, and general good conduct, but the usual testimonials will be required for at least the last 18 months at sea preceding the date of the application to be examined. They must be signed by the Master and Chief Engineer, or in the case of testimonials to Chief Engineers by the Superintendent Engineer, and must clearly state whether the applicant was on regular watch, and in regular charge of a watch on the main engines or boilers; also, if not engaged on both engines and boilers, the length of time he served on each separately. It is desirable that testimonials should be endorsed by the Superintendent Engineer.

In cases where a testimonial from the Chief Engineer or from the Master is for any sufficient reason not obtainable, one from the Superintendent Engineer or from the Managing Owner, or Secretary, or Chairman of a large company may be substituted; but, in every such instance, the testimonial must declare that the facts stated are in accordance with the reports made by the Chief Engineer, or the Master, as the case may be, or else that they are within the writer's personal knowledge.

If, in any case, testimonials appear to have been withheld for improper or inadequate reasons, full particulars should be reported by the Examiner to the Chief Examiner.

25. **Fraud and Misrepresentation.**—Any person who makes, assists in making, or procures to be made, any false representation for the purpose of procuring either for himself or for any other person a Certificate of Competency, shall, in respect of each offence, be guilty of a misdemeanour, which is punishable, on summary conviction, with imprisonment for a term not exceeding six months, with or without hard labour, or with a fine not exceeding five hundred rupees.

26. **Physical Defects.**—When an applicant is observed to be hard of hearing, or is labouring under any other obvious physical defect, the signatories of his testimonials are required to mention that defect specifically, and to state whether it in any way interfered with the efficiency of the applicant as an engineer on watch. When these modified testimonials are such as completely to satisfy the Examiner that the defect is not such as to interfere with the efficient discharge of the applicant's duties as engineer, the examination is proceeded with; otherwise the case is referred to the Chief Examiner. Candidates afflicted with nervous impediment in speech may write their answers to *viva voce* questions.

27. **Penalty for Misconduct.**—Applicants who have neglected to join their vessels after having signed Articles, or who have deserted their vessels after having joined, or or who have been found guilty of gross misconduct, will be required to produce satisfactory proofs of two years' subsequent service and good conduct at sea, unless the Government, after having investigated the matter, should see fit to reduce the time. Particulars of all such cases should be referred to the Chief Examiner.

28. **Foreign Engineers.**—Foreign engineers cannot be examined for a First Class Certificate unless they have performed the sea-service stated in rule 38, with the requisite British Certificate. The service may have been performed in foreign vessels if the applicant can produce satisfactory testimonials as to conduct and character, and is able to prove that the service has been in the required capacities, and that during the period of service he has held a British Certificate of Competency of the grade required by the Regulations (*see* rule 20).

29. **Foreign Engineers must know English.**—Foreign engineers must prove to the satisfaction of the Examiners that they can speak and write the English language sufficiently well to perform the duties required of them on board a British vessel.

30. **Issue of Certificate.**—If the candidate passes he will receive a form (Exn. 16) authorising the Port Officer to whom it is addressed to issue the Certificate. The candidate's testimonials and other papers will be returned to him when the examination is finished. It is therefore important that the port at which the Certificate is to be issued should be the same on both the form Exn. 16 and the form of application, Exn. 3. If circumstances should make any alteration necessary, the Examiner should see that it is made in both forms; otherwise delay in the issue of the Certificate may be caused.

31. **Service found to be Insufficient.**—If, after a candidate has passed the examination, it is discovered on further investigation that his services are insufficient to entitle him to receive a Certificate of the grade for which he has passed, the Certificate will not be granted to him; but if the Government are satisfied that the error in the calculation of the candidate's services did not occur through any fault or wilful misrepresentation on his part, he may either have the fee returned to him or have it placed to his credit. Should his services entitle him to a Certificate of a lower grade it may be granted to him, and the difference, if any, between the fee paid by him for the superior Certificate and the fee payable for the inferior Certificate will be returned to him or placed to his credit. The superior Certificate will not be granted until the candidate has performed the amount of service in which he was deficient, and has been re-examined in all the subjects, unless the Government see fit to dispense with the re-examination.

32. **Copy of Lost Certificate.**—An applicant for a certified copy of a lost Certificate, either of Competency or Service, must fill in a form of application, Exn. 23, giving the particulars required, and hand it to the Port Officer. A declaration as to the circumstances in which the Certificate was lost must be made by the applicant before a Magistrate.

No fee will be charged if the applicant can prove that the Certificate was lost through shipwreck or fire.

33. **Masters' and Mates' Examination in Steam.**—Particulars of the examination of Masters and Mates in steam will be found in Appendix G.

CHAPTER II.—*Qualifications required for the various grades.**

34. **Second Class Engineer.**—A candidate for a Second Class Engineer's Certificate, whether Ordinary or Motor, must be not less than 21 years of age.

(*a*) **Workshop Service.**—A candidate must have served as apprentice Engineer for four years at least in the United Kingdom or five years in India and prove that during this period he has been employed in the manner set forth in rule 42.

Service as journeyman is accepted in lieu of apprenticeship.

If the character of the workshop service performed is not of the standard prescribed, additional service will be required as explained in rule 43.

If the total period of the candidate's workshop service, as calculated in accordance with these Regulations, is less than four or five years as the case may be, the candidate may make up the deficiency by service at sea, either (1) on day work on board foreign-going steamships of not less than 66 nominal horse-power, and/or motor ships of not less than 373 brake horse-power, or on regular watch on the main propelling machinery of such ships, or (2) on regular watch on the main propelling machinery of home trade steamships of not less than 66 nominal horse-power, and/or motor ships of not less than 373 brake horse-power; such service to be counted as equivalent in the case of (1) to two-thirds, and in the case of (2) to four-ninths of service as apprentice Engineer or journeyman. No day work at sea performed before the age of 21 years will be accepted.

(*b*) **Sea Service.**—In addition to the above workshop service or the alternative sea service, a candidate must have served at sea for a period equivalent to 18 months in foreign trade, as engineer on regular watch on the main propelling machinery of steamships of not less than 66 nominal horse-power, and/or motor ships of not less than 373 brake horse-power. Time served in the home trade is reckoned at two-thirds of the time similarly served in foreign trade. For an Ordinary Certificate, at least two-thirds of the required period of service must have been performed in steamships, and for a Motor Certificate at least two-thirds must have been performed in motor ships. The remainder of the service, in each case, may be performed in either steam or motor ships.

35. **Second Class Certificate: Syllabus of Examination.**—A candidate for a Second Class Certificate, whether Ordinary or Motor, is required—

(*a*) to write legibly, spell correctly, and express himself, generally, in creditable English:

(*b*) to show sufficient knowledge of the metric system, etc., and of mathematics for dealing, successfully with simple problems relating to mechanical principles, beams, safety and relief valves, consumption of fuel and stores, capacities of bunkers, tanks, etc., speed of vessels, strength of pipes and receivers, subjected to internal pressure, stresses in shafting and other parts of the machinery, etc.:

(*c*) to be familiar with the physical characteristics of the metals and other materials commonly used by sea-going Engineers:

(*d*) to have a creditable knowledge of the facts relating to steam, heat, combustion and the formation of smoke:

(*e*) to understand the use, construction, and principles involved on the action of the pressure gauge, thermometer, barometer, salinometer, and other meters commonly used by Engineers on board ship:

(*f*) to be able to state the causes, effects, and usual remedies for incrustation and corrosion:

(*g*) to know how to make good the results to the machinery of ordinary wear and tear; how to test the fairness of shafting; how to correct defects due to corrosion, flaws or accident; and how a temporary or permanent repair could be effected in the event of derangement or total breakdown:

(*h*) to understand the construction of centrifugal, bucket, and force pumps, the principles on which they act, and the general requirements concerning bilge and ballast pumping systems:

(*i*) to understand the construction and working of steering-engines and gears, electric light engines and dynamos, electric motors, refrigerating machinery, hydraulic machinery, and such internal combustion engines as are used to drive ships' launches, emergency and auxiliary machinery on board ship:

* These qualifications are shown in tabular form in Appendix J.

If any such candidate fails to pass the examination for the First Class Certificate, but passes that for the lower grade, he may be given a Second Class Certificate of Competency, but no part of the fee will be returned. If he fails in practical knowledge, he may be re-examined for a Second Class Certificate only, subject to the usual regulations relating to such failures.

Until the 1st January 1924, the holder of a Second Class Ordinary Certificate may be examined for a First Class Motor Certificate without previously obtaining a Second Class Motor Certificate, provided that he proves that he has served for at least 18 months at sea in a capacity qualifying for First Class, in a suitable motor vessel.

41. **Endorsement of Certificates.**—The holder of an Ordinary Certificate may, at any time, have it endorsed to the effect that he is competent for service in the appropriate capacity in motor ships, provided that he proves at least 9 months' service in foreign trade or 13½ months in the home trade in a qualifying capacity, in motor ships of horse-power not less than that required by these Regulations, and passes the appropriate examination. The holder of a Motor Certificate may have it endorsed for service in steamships provided that he proves at least 12 months' service in foreign trade or 18 months in the home trade in a qualifying capacity in steamships of horse-power not less than that required by these Regulations and passes the appropriate examination.

Sea service performed in charge of a watch in vessels of the required horse-power whilst holding a Second Class Certificate, either Ordinary or Motor, will be accepted as qualifying for First Class Endorsement of either denomination, provided that in the case of an Ordinary endorsement the necessary experience has been gained on both main engines and boilers of a steamship. (*See* rule 46.)

42. **Workshop Service.**—A candidate is expected to have served not less than four years in the United Kingdom or five years in India as apprentice Engineer or journeyman, at the making or repairing of steam or internal combustion engines such as would be recognised as affording useful training for a marine engineer. No time served before the age of 15 will be accepted.

Not less than two years in the United Kingdom or three years in India of this period should have been devoted to fitting, erecting or repairing engines of suitable size, either in the works or outside, and the remaining two years may have been spent (1) on work of this nature; (2) on work in other branches of the trade, subject to the time allowances specified in the schedule below; (3) at an approved technical school, subject to the conditions specified in rule 45.

SCHEDULE OF TIME ALLOWANCES in respect of workshop service, other than fitting, erecting or repairing, but performed in connection with engines of the nature indicated above. Total maximum allowance two years.

Turning	Full time.
Working in drawing office ...	Full time up to one year, and beyond one year one-half time.
Brass finishing (good heavy work)	Full time up to one year, and beyond one year one-half time.
Boiler making or repairing ...	One-half time.
Smith work	One-half time, with a maximum allowance of one year.
Planing, slotting, shaping, and milling	One-third time.
Coppersmith work ...	One-third time, with a maximum allowance of six months.

In the event of the apprenticeship time being extended to five years in the United Kingdom or six years in India or more, four years at turning *followed* by one year in the United Kingdom or two years in India at fitting or erecting may be accepted as qualifying.

This rule applies only to works at which the making and/or repairing of engines, boilers, etc., forms part of the regular business for which the works exist. Service at works where the repairing of engines, boilers, etc., is merely incidental to the running of plant, however large, which is used for the production of power for other machinery, etc., should be dealt with under rule 43, each case being considered on its merits.

43. **Workshop Service where engines of suitable size are not made or repaired.**—Workshop service other than that mentioned in rule 42 may be accepted if it is considered useful training for a sea-going Engineer, but each case must be submitted to the Chief Examiner for consideration before the applicant is examined. For every 12 months of such service accepted, the applicant must have performed at least an additional three months' service on marine engines (steam or motor), either in the works, or at sea on regular watch on the main propelling machinery or on day work; and a longer additional period may be required if the deficient character of the service warrants further compensation.

44. **Service in Colonial and Foreign Workshops.**—Rules 42 and 43 apply to service in the United Kingdom and/or India only. Service in a Colonial or foreign workshop will not be accepted unless the Examiner is satisfied in each case that its value is substantially equivalent to that of service performed in the United Kingdom and/or India. In cases where the Examiner is not satisfied that the value is equivalent, he should refer the matter to the Chief Examiner.

Workshop service in India is in no case to be taken as equivalent to more than four-fifths of the same period of service in the United Kingdom.

45. **Technical Schools.**—Time spent at an approved day Technical School, where there is an engineering laboratory, is, subject to the conditions mentioned in Appendix II, accepted as equivalent to workshop service, usually in the ratio of three years in the Technical School to two years' workshop service, provided also that the applicant has taken the full engineering course, and can produce the Principal's certificate for regular attendance at all the approved classes, and for satisfactory progress.

Time spent in attending evening classes in Engineering at approved Technical Schools will similarly be allowed to count under the following conditions:—

(1) each applicant claiming an allowance for time spent in attending evening classes at a Technical School must produce a certificate signed by the Principal of the School to the effect that he has attended regularly at a definite class or classes, which should be specified, and has made satisfactory progress. This certificate must also state the total number of hours spent by the applicant in attending each class.

(2) time spent by the applicant in attending such classes as have a direct bearing on the training of a Marine Engineer will be reckoned at the rate of five hours to one day. The total number of days so obtained will then be accepted in lieu of a certain fraction of the same period of workshop service. This fraction will be fixed for each school at the time of approval, and will generally be two-thirds;

(3) an applicant who has attended a Technical School in the evening, while being employed as an apprentice Engineer or journeyman during the day, must, in order that the school time may be accepted, produce satisfactory proof that he has spent the full working day in the works at which he is employed before attending the school. Such proof will usually take the form of a statement in the testimonial as to workshop service given by the employer.

Time spent in foreign technical schools can in no circumstances be recognised.

For list of approved technical schools and time allowed for attendance at each *see* Appendix H.

46. **Sea-service.**—The sea-service required by these Regulations is, unless otherwise stated, service performed in foreign-going ships propelled by engines of at least the horse-power specified for the respective grades of certificate. The nominal horse-power of a steamship, as given on the Certificate of Registry, may in all cases be accepted by the Examiners; or it may be determined by the following formula:—

$$\text{N.H.P.} = \frac{(3H + D^2\sqrt[3]{S})\sqrt{P}}{700}$$

where H = heating surface of main boilers in square feet, measured down to the level of the fire bars, but excluding the front tube plate.

D^2 = square of diameter of low pressure cylinder, or sum of squares of diameters of cylinders in non-compound engines, measured in inches.

S = length of stroke of engines in inches.

P = pressure of main boilers in pounds per square inch.

Service in the home or coasting trade is regarded as being equivalent to two-thirds of the same period of time served in the foreign trade except where other allowances are specified. (*See* rules 34, 38, 41, 48, 49, 50 and 51.)

In the case of Indian coasting voyages extending beyond a distance of 500 miles from the port of departure in steamships commanded by Masters holding foreign-going certificates, such service will count as foreign voyages, and will be reckoned as full time; but the time spent in the port of departure or Home port will not be allowed to count. In all cases the length of service is deemed to commence on the date of sailing from the port of departure or Home port and to end on the date of arrival at the Home port.

Being on regular watch means being on watch for at least eight hours each day continuously.

In the case of applicants for First Class Certificates, qualifying service means, as a rule, service on regular watch on the main engines and boilers as Senior Engineer in charge of the whole watch. When, however, several Engineers are on watch at the same time, the service of any one of them may be allowed to count, provided a certificate from the Superintendent Engineer is produced stating that the applicant was in charge of a watch on a definite section of the main engines or boilers in a separate compartment of the ship. During the whole of the period claimed, the applicant must have been in possession of a Second Class Certificate.

In the case of applicants for Second Class Certificates, qualifying sea service means service as Engineer on regular watch on the main engines or boilers. In no case will time spent in clerical or day work be allowed to count as watch-keeping service.

All applicants for Ordinary Certificates (including those for First Class who have not been in charge of the whole of a watch but qualify under this rule as having been in charge of a section of the machinery only) will be required to have served at sea on regular watch on both the main engines and the boilers, not less than six months being spent on each.

47. **Marine Technical Schools.**—An applicant for either a Second Class or a First Class Ordinary or Motor Certificate who, within two years from the date of application to be examined, has attended an approved course, comprising general mathematical and scientific instruction at a Technical School recognised by the Government as suitable for the training of *Marine* Engineers, will be allowed to count time so spent as equivalent to sea service usually in the ratio of three months at the Technical School to two months at sea. Time so spent cannot be accepted as equivalent to more than one-sixth of the total sea service required for either Certificate, but an applicant who has been allowed to count such time on examination for a Second Class Certificate will not be debarred from counting similar subsequent time on applying for examination for a First Class Certificate.

In every case in which an allowance is made for time spent at a Marine Technical School, the applicant will be required to produce the Principal's Certificate for continuous and regular attendance at all the approved classes, and for satisfactory progress.

The applicant must also produce his class note books, which will be forwarded to the Chief Examiner, in order that he may satisfy himself that the applicant has followed the approved course of instruction, and that the remission of sea service claimed may be allowed accordingly.

Applicants for examination who claim remission of sea service should, as a rule, make their claim on form Exn. 3 at least a week before they desire to sit.

A list of the Marine Technical Schools recognised for this purpose is given in Appendix H.

48. **Lake or River Service.**—Service as watch-keeper on a lake or river vessel of not less than the required horse-power may be accepted under the following conditions for either an Ordinary or a Motor Certificate :—

(*a*) the service will only count half as much as sea service ; *i.e.*, every two months of lake or river service is only equivalent to one month's foreign-going sea service ;

(*b*) applicants for Second Class Certificates must prove that, in addition to lake or river service, they have had at least three months' qualifying service at sea in a foreign-going ship of not less than the horse-power specified in rule 34 (*b*), or four and a half months' similar service in the home trade ;

(*c*) applicants for First Class Certificates, in addition to lake or river service in vessels of not less than the horse-power named in rule 38, must prove that they have had at least six months' qualifying service at sea, with a Second Class Engineer's Certificate, in foreign-going vessels of not less than the horse-power specified, or nine months' similar service in the home trade.

49. **Service in Auxiliary Screw Ships.**—Service as Engineer performed on board auxiliary screw whalers and other vessels with auxiliary power not less than that required for a Second Class Certificate may be allowed to count as qualifying for examination for a Second Class Engineer's Certificate to the extent of one-half the time the vessel is actually at sea. If the applicant is able to prove that the main engines were running for longer than this, he will be allowed to count the whole of such extended time.

50. **Service in Dredgers, Fishing-boats, Tug-boats, or Pilot-vessels.**—Service in sea-going dredgers, fishing-boats, or tug-boats, and in pilot-vessels when on their station or when going to or returning from the same, may be accepted under the following conditions :—Two months of such service is only equivalent to one month's qualifying service in a foreign-going vessel. Applicants for Second Class Certificates may perform all their sea service in sea-going dredgers, fishing-boats, tug-boats, or pilot-vessels, but they must have been on regular watch on the main propelling machinery, the horse-power of which must not be less than that required. Candidates for First Class Certificates must, while in possession of a Second Class Certificate, have served in vessels of at least the horse-power named in rule 38, and have been in charge of the whole of a watch on the main machinery. They must also have served, in a qualifying capacity, for not less than six months in a foreign-going ship, or nine months in a home-trade ship.

This rule will not apply to service on the steam pilot vessels at the Sandheads. Service on the regular watch on board such vessels for the period the vessels are on the station, or when going to or returning from the same, shall be accepted as equivalent to two-thirds of the time performed in foreign-going trading vessels, as in the case of steam yachts.

Where an Engineer is employed on a fishing or other vessel, and is required to do stoking or other work not usually performed by an Engineer in the Mercantile Marine, such service cannot be accepted as qualifying.

The Examiners should in all cases satisfy themselves that service on fishing boats, when claimed as qualifying for a certificate as Engineer, is of a nature similar to that performed by Engineers in the Mercantile Marine.

51. **Service in Yachts.**—Service performed in yachts, either within or beyond home-trade limits, may be accepted as equivalent to two-thirds of the time performed in foreign-going trading vessels, provided that the applicant's name is entered on the vessel's articles, and that he can prove, to the satisfaction of the examiner, that the time claimed was actually served at sea.

Applicants for Second Class Certificates may perform all their service in yachts, but the applicant must have been on regular watch on the main machinery, and the vessel must be of not less than the horse-power stated in rule 34 (*b*).

Applicants for First Class Certificates must have served in vessels of the requisite horse-power, and must have been in regular charge of the main machinery. They must also have served for at least three months in a qualifying capacity on board a suitable foreign-going ship. This additional service will, however, not be required in the case of an applicant who has served for 27 months as First Engineer, or for three years as a Second Engineer, of a yacht of the requisite power.

CHAPTER III.—*Conduct of the Examinations.*

52. **Strangers not Admitted.**—No persons will be allowed in the rooms during the examinations, other than those whose duties require them to be present.

No instructors will be allowed on the premises

53. **Commencement and Duration of Examinations.**—The examinations will, as a rule, commence at 10-30 A.M., and will be continued from day to day, until all the candidates are examined.

54. **Candidates to be Punctual.**—Candidates are required to appear at the examination room punctually at the time appointed.

55. **Candidates' Places.**—Candidates should be so placed as to prevent one copying from another, and no communication whatever between the candidates should be allowed.

57. **Tables to be Cleared.**—Before commencing the examination, the tables and desks must be cleared of all scraps of paper, or books that are not used in the examination, and care should be taken that the candidates while in the examination room do not have in their possession any book or paper, except as specified in rules 61 and 62. A sheet of blotting paper will be issued to each candidate with the first examination paper, and it must be returned to the examiner when the last paper is completed each day. The examiner should be careful to see that the blotting paper has not been used by the candidate in solving his problems, or for conveying information to other candidates.

57. **Drawing Instruments.**—Drawing boards and T squares will be provided by the Government, but the applicants will have to bring with them any drawing instruments they may require.

58. **Examination Papers.**—One set of the arithmetical questions should be given to the candidate for the morning's work at 10-30 A.M. and one for the afternoon's at 1-45 P.M., and collected not later than 1 and 4-30 P.M. All question sheets should be returned to the Chief Examiner at the conclusion of each day's work.

59. **Order of Examinations.**—At the examinations for First and Second Class Ordinary and Motor Certificates, papers on Practical Mathematics, Drawing, and Engineering Knowledge are given, and the candidates are finally questioned verbally on their Practical Knowledge.

Mathematics and Drawing are omitted in the case of examination for the Endorsement of a Certificate for converse service in the same grade.

Each paper on Practical Mathematics and Engineering Knowledge contains six questions. According to present arrangements, the papers, which are of distinctive colouring, are usually distributed in the following order :—

Time.	Second Class.	First Class
First day :—		
Morning ...	Drawing	Practical Mathematics. 1st Paper (grey).
Afternoon ...	Engineering Knowledge. 1st Paper (white)	Practical Mathematics. 2nd Paper (pink).
Second day :—		
Morning ...	Practical Mathematics. 1st Paper (white)	Drawing.
Afternoon ...	Practical Mathematics. 2nd paper (yellow).	Drawing.
Third day :—		
Morning ...	Engineering Knowledge. 2nd Paper (yellow).	Engineering Knowledge. 1st Paper (grey).
Afternoon ...	Verbals	Engineering Knowledge 2nd Paper (pink).
Fourth and following days.	Verbals	Verbals.

60. **Rules to be observed during the Examination.—**

I. Candidates must not have with them any books, notes, memoranda or paper other than that supplied for use at the examination. If any candidate has brought any such notes, etc., with him he must hand them to the Examiner before beginning his work.

II. Perfect silence must be observed during the examination.

III Candidates are advised to read the questions carefully, and to confine their attention to the problems as presented, without dealing with extraneous matter. This advice is applicable to all parts of the examination, but especially to the Drawing.

IV. The numbers of the questions to which the working has reference should be clearly indicated, but the questions themselves should not be copied. All work should be done in ink, except as specified on the subject-paper for drawing.

V. Suitable recognition will be given for clear statements, reasoning and calculations in solving the problems.

VI. Candidates will be required to write a report, or letter, in which English composition and legible handwriting will be taken into account; and bad grammar, faulty spelling and errors of punctuation will be discredited.

VII. Additional sheets of paper will be provided by the Examiner, if required. Only one side should be used, and the candidate should sign his name, and write the port and date, at the foot of each sheet. These particulars should also be given on the cover of each answer-book and on each sheet of drawing paper used.

VIII. Reference to the mathematical tables provided for the purpose is allowed, except in respect of questions which distinctly state that such reference is not permissible.

IX. Candidates may, if they wish, use slide-rules for checking their calculations, but in each case the full working necessary for arriving at the result must be shown in ink, otherwise no significance will be attached to the answer.

X The question papers and mathematical tables, which are the property of the Government, must not be written upon or defaced in any way.

XI. No candidate may leave his seat or the examination room without permission; and if he leaves the room he will not be permitted to go on with any sheet or problem which he had in hand before leaving the room.

XII. Candidates must not communicate with each other or use any unfair means.

XIII. A candidate guilty of any breach of these rules will be subjected to all the penalties of failure, and may be excluded from further examination for such period as the Government may decide.

61. **Mathematical Tables** (Rule VIII).—All candidates for examination may use the examination room book of logarithms, which must always be kept under the charge of the Examiner, who will be careful to observe that it is not used to conceal memoranda prepared for these examinations. No other books will be allowed unless the question see specially states that a book may be referred to.

All candidates may, however, be allowed to use their own tables of four-figure ogarithms if they so desire.

In allowing the use of such Tables, Examiners should be particularly careful to see that they contain no notes, formulæ, or other information, either printed or written, apart from the actual tables of logarithms and trigonometrical ratios; and, before the commencement of the examination, any tables which the candidates propose to use should be examined to see that no other matter is contained in them.

62. **Leaving Examination Room** (Rule XI).—In the event of a candidate being permitted to leave the room, the Examiner should substitute other questions for those which have not been attempted.

63. **Penalty for Breach of Rules** (Rule XIII).—The circumstances attending any breach of the Rules or Regulations, or any disorderly or improper conduct in or about the examination room, should be reported immediately to the Chief Examiner, who will in due course advise the Examiner as to any penalty the Government may decide to inflict.

64. **Marking Worked Papers.**—The value of the work done in all four sections of the first and second class examinations (Practical Mathematics, Drawing, Engineering Knowledge, Verbals) will be assessed and recorded in accordance with the following scale:—

Marks	0— 49	=	Weak,	denoted by	symbol W.
„	50— 59	=	Consider	„ „ „	C.
„	60— 74	=	Good	„ „ „	G.
„	75—100	=	Superior	„ „ „	S.

In order to pass, a candidate's work should be "Good" in all four sections, but it *must* be "Good" or "Superior" in verbals. A "Consider" in either the Practical Mathematics, Drawing or Engineering Knowledge paper may be counterbalanced by a "Superior" in any of the other sections. Two "Considers" or one "Weak" will entail failure.

65. **Verbals.**—The Examiner should deal with practical, rather than theoretical, questions in this division of the examination, and no candidate should be failed in the verbal examination without having been well cross-questioned on the points on which failure takes place.

Questions on the management of engines and boilers at sea, the duties of the supervising engineer, the work to be done to the engines, boilers and auxiliary machinery in port, and the periodical examinations of the working parts, should form part of the verbal examination.

It is considered of great importance that candidates for examination should have an extensive knowledge of the particulars of actual casualties which have occurred at sea, and be able to state how these might have been prevented, and how they were remedied.

Should a candidate have had no personal experience of any defects, and be unable to describe casualties to machinery which may have occurred in the experience of others, he should be closely questioned as to his knowledge of boiler and engine construction and repair.

As it is possible for a candidate to obtain pass marks in Practical Mathematics, although apparently unable to calculate horse-power from indicator diagrams, strength of boiler seams, etc., and, further, as a drawing may be passed as such although containing faults of a practical description, examiners should, as far as practicable, scrutinise the worked papers, and in each candidate's verbal examination include questions on such practical deficiencies as may appear in his papers.

The points on which a candidate fails in verbals must be reported on Exn. 37.

66. **Examination Results.**—The results of examinations should be communicated to all candidates.

67. **Voluntary Retirement to be discouraged.**—Voluntary retirement from any examination should be discouraged. Each first and second class candidate should be taken through the whole examination, at least on first presenting himself, in order that his ability in all four sections of the examination may be ascertained and recorded.

68. **Failure in Examination.**—Failure in a number of questions involving fundamental principles, or in subjects ignorance of which might lead an Engineer to do something actually unsafe in the management of any part of a ship's machinery (*e.g.*, questions on manipulation and reading of the water-gauge, the danger of fire and explosion in motor vessels, etc.), will be regarded as failure in practical knowledge, and any candidate so failing may not present himself for re-examination until he can produce proofs of six months' further service at sea in a qualifying capacity, as engineer on watch on the main engines or boilers of a foreign-going ship, or its equivalent in the home trade (nine months), subsequent to the date of failure.

In cases of failure, other than failure in practical knowledge, the candidate may present himself for re-examination at any time, but if he fails three times in any part or parts of the examination within any period of three months, he will not be re-examined until after a lapse of three months from the date of the last failure.

In any cases of failure the re-examination must embrace all the subjects.

69. **Reports of Examinations.**—Reports of examinations on forms Exn. 15 and Exn. 37, together with the candidates' applications (form Exn. 3) duly completed, their lower grade Certificates, if any, and all examination papers which have not already been forwarded, should be sent to the Chief Examiner as soon as the examinations are finished. The candidates' discharges and testimonials, except such as are directly addressed to the Examiners, should be returned to them.

3. On Monday at noon the counter stood at 899342. The engines continued to run at full speed, making 79 revolutions per minute, until 4 P.M. on Tuesday, when the speed was reduced. At noon on Wednesday the counter stood at 099024. What were the average revolutions per minute whilst running at reduced speed? (6 marks.)

4. A metal pipe is 11 feet long over all, 6 inches in external diameter, and the metal is 0·47 inch thick. There is a flange at each end 11 inches in diameter and 0·76 inch thick. If the specific gravity of the material is 8·8, what is the weight of the pipe in pounds? (12 marks.)

5. A weight of 5½ tons is raised by means of a screw jack, the pitch of the screw being ½ inch. If a force of 51 pounds is required at the end of the lever in order to turn the screw, and 61 per cent. of the power is lost in friction, what is the length of the lever? (10 marks.)

APPENDIX F.

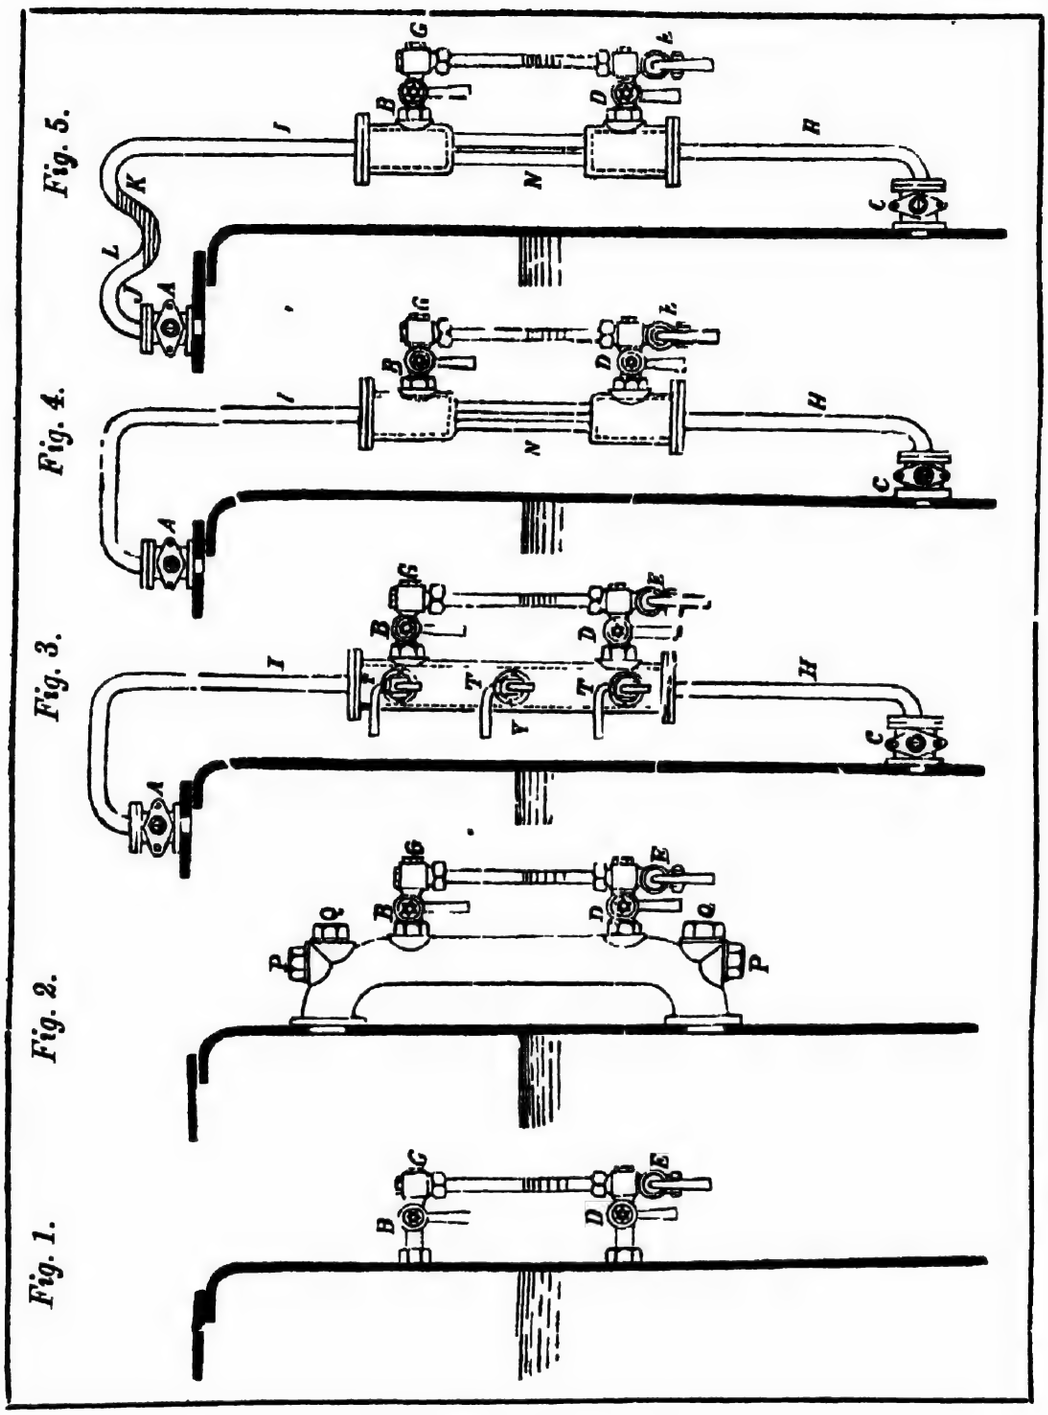
Reading the water-gauge.

Notwithstanding that the reading of the water-gauge is made a special feature in the examination of Engineers, many boiler casualties result from the Engineer of the watch either not understanding the construction of the water-gauge fittings or not satisfying himself by actual trial that the cocks, pipes, etc., are clear.

Unless a candidate under examination is able to prove that he understands how to verify the indications of the water-gauge, he should not be passed in practical knowledge, and, as failure in practical knowledge involves the candidate going to sea for another six months before being eligible for re-examination, the Examiner should explain to such candidate his error, after failing him, in order to prevent further casualties resulting from his want of knowledge on this subject.

The sketches, Figures 1, 2, 3, 4 and 5, Plate I, represent the usual methods of attaching water-gauge mountings to marine boilers, the smoke-boxes being omitted, for convenience, from Figures 3, 4 and 5. The important features in each gauge and the method of verifying its indications are dealt with separately in the following remarks.

Plate 1.



Referring to figure 1 only.

In this case the water-gauge cocks are attached direct to the boiler, and the accuracy of the gauge when the boiler is under steam can be tested as follows :—

First.—Let B remain open, then close cock D and open cock E, and if steam issues it proves that cock B and the passage through the top fitting and gauge glass are clear. If no steam or water issues, either cock B or the passage through the top fitting and gauge glass is choked and the gauge cannot act properly until the obstruction is removed.

Second.—Close cock B and open D and E, and if water issues, cock D is clear. If no water or steam issues, either cock D or the passage from the boiler through the lower fitting is choked and must be cleared before the gauge can act properly.

Referring to Figure 2 only.

In this case the gauge cocks are attached to a bent pipe of comparatively large diameter (at least 3 inches in the bore), the upper end of which communicates with the steam space, and the lower end with the water space of the boiler. Owing to the bore

of the pipe being large, it is not likely to become choked or stopped under the ordinary conditions of working. The water-gauge is, therefore, in practically the same condition as if it were attached direct to the boiler, as in Figure 1. This gauge, when at work, is tested in precisely the same manner as the one shown in Figure 1.

Screw plugs are inserted at P.P. and Q.Q. by the removal of which the apertures in the pipe can be cleared, if necessary, by the insertion of a wire or rod when steam is down.

Referring to Figure 3 only.

In this gauge there is an open communication from A to C through the column Y, and in order to "blow through the *glass*" it is only necessary to shut cocks D and B alternately, keeping E open. But to "blow through the *water-gauge*," including the pipes H and I, it is necessary, after blowing through the glass as described above, to shut A and C alternately, at the same time keeping B, D and E open for such time as will ensure the complete discharge of the contents of the gauge and its connections. When B, D and C are clear and A choked, the steam lodging in the glass and in the pipe I leading from column Y to A becomes condensed and the water flowing through C to take its place rises in column Y and in the glass to a level above that of the water in the boiler. In other words, the gauge shows a false level. If now E be opened and water is blown out, then on E being again closed the water in the gauge will rise higher than before and be still further misleading. On the other hand, when B, D and A are clear and C choked, the water, if any, in the glass is trapped and no longer rises and falls with the water in the boiler or with the motion of the vessel; it, however, slowly rises in the glass owing to the condensation of the steam in the upper part of the gauge until such time as E is opened, when the whole of the water in the glass is blown out; and on E being closed, the glass does not show any water, notwithstanding that the water in the boiler may be at the proper level. When the test cocks T.T.T. are attached to column Y, as shown in Figure 3, they cease to be reliable when either cock A or C or the pipe in connection therewith is choked, or nearly choked.

Referring to Figure 4 only.

Sometimes the water-gauge fittings are arranged as shown in Figures 4 and 5, with no passage up the column, the central portion (N) of the column being simply a pillar or connecting piece of any convenient section between the upper and lower portions to which the cocks B and D are attached.

By this arrangement double communications are obviated and there is no need for what is known as "double shut off" in testing the accuracy of the gauge. When, however, the gauges are constructed in this manner, the cocks B and D are unreliable as test cocks in the event of there being no glass in the gauge. This feature should be carefully noted. Moreover, when in working condition, the reduction of pressure in the glass which arises when E is opened causes the water in pipe H to rise above its normal level. This objectionable feature should also be noted.

Referring to Figure 5 only.

Sometimes there is a bend, L, in the steam pipe I leading from cock A to cock B. This has occasionally escaped observation when new boilers have been fitted on board ship. In most cases this bend arises from the pipe being led in an abnormal direction to escape other pipes, beams or fittings near the smoke-box. With such a bend the condensed steam collects in the pipe and falls to the bottom of the bend, and in time it completely fills the pipe from J to K. The steam from K down to the level of the water in the glass is thereby trapped and, as condensation proceeds, leads to a reduction of pressure in the pipe below that of the boiler and an equivalent rise of the water in the bend and also in the gauge glass. When the vessel is quiescent the water in the gauge glass increases in height until cock E is opened or until the pressure in the boiler is so much in excess of that in the lower part of pipe I as to cause the water in the bend to be blown into the gauge glass. In either case instantaneous change of water level in the glass ensues.

In the ordinary course of working, the phenomenon described above is more or less modified by the presence of air in the upper part of the gauge and by the rise and fall of the water in the boiler and gauge glass arising from the rolling or pitching motions of the vessel.

Other Special Points to be noted.

When the cocks A and C are omitted, as in Figure 2, it is owing to the bore of the stand pipe being sufficiently large to enable it to be regarded as part of the boiler. Such pipes require, however, to be examined and cleared at intervals by passing a rod through the holes provided for the purpose at P.P. and Q.Q.

Cocks at A and C are not necessary for the testing of gauges arranged as shown in Figures 4 and 5. Examiners ought, however, to make sure that candidates are aware of the impossibility of testing the reliability of the indications of water-gauges arranged as in Figure 3 when the cocks A and C are absent, and of the effect which the choking of cock A or C or pipe H or I has on the indications of the test cocks T.T.T. attached to column Y.

Probably more than half the steamers afloat are fitted with water-gauges as shown in Figures 3 and 4, and it is therefore specially important that engineer candidates should thoroughly understand their construction, the principle on which they act, and the steps which must be taken to keep them in an efficient condition.

When fitting a gauge glass into its place, it is specially important that it should not be placed so high as to prevent a clearing rod being inserted at G, Figures 1, 2, 3, 4 and 5. This defect, especially if it occurs in a water-gauge attached to a boiler subject to priming, permits a rapid accumulation of scum around the top of the glass and results in the choking of the orifice leading from cock B to the gauge glass in each of the figures.

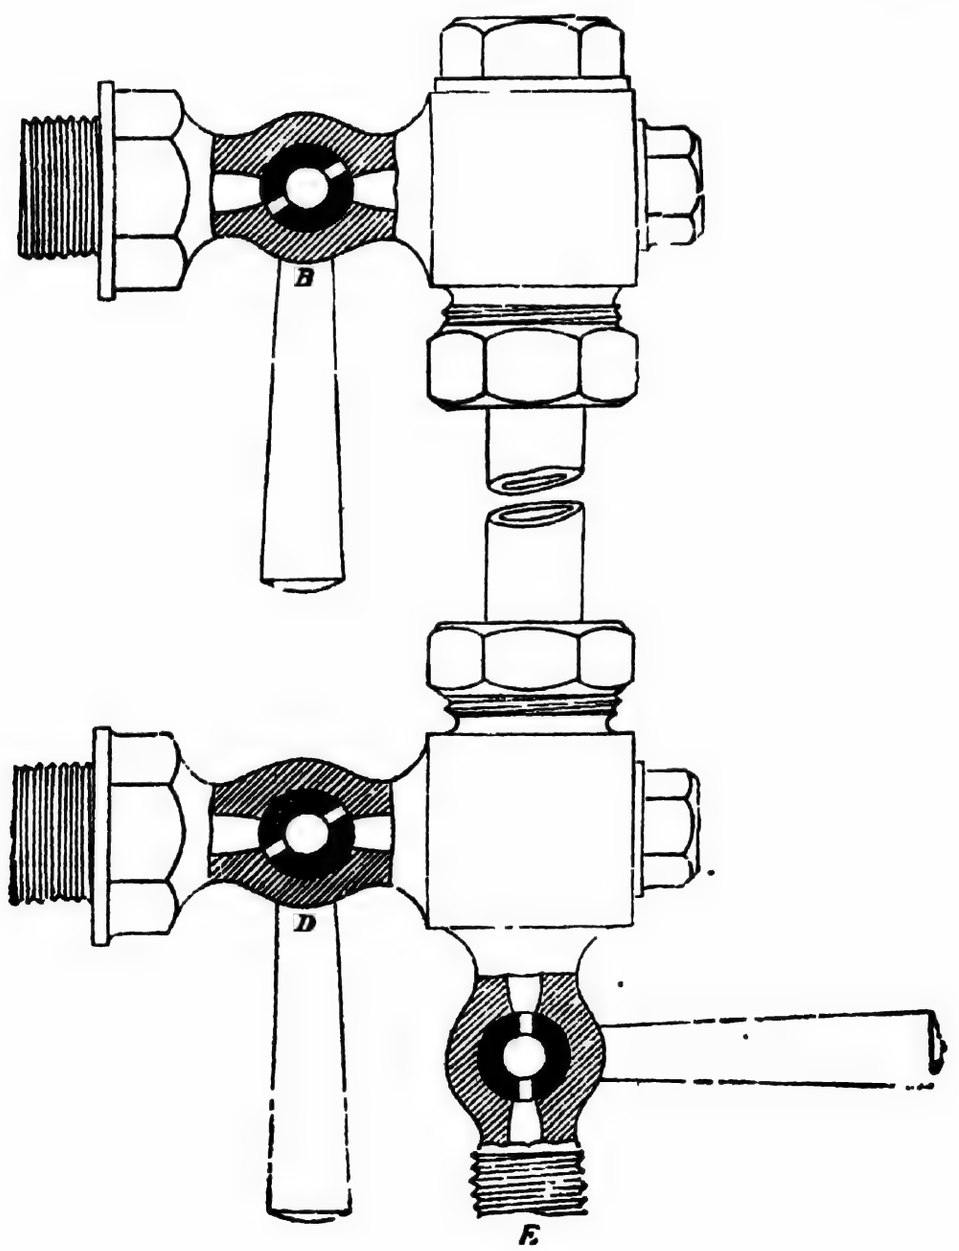
When a gauge glass is too short, or is placed either too high or too low in the fittings, it is also liable to become choked by the packing material being forced over its ends by the glands whilst being screwed up.

The use of unsuitable or insecure internal pipes in connection either with the ordinary glass gauge cocks of the description shown in Figure 1, or with test cocks which are jointed to the boiler itself, should also be carefully guarded against.

Boiler casualties have resulted from the cocks B and D having the parts wrongly placed as shown in Figure 6, Plate II. In one case of that kind, which forms the subject of Report No. 208 under the Boiler Explosions Acts, the engineer in testing the water-gauge omitted to see that the passages in the cocks B and D were clear *when the handles were in their proper working position*. This defect could easily have been discovered if proper attention had been paid to the condition of the cocks. A defect of this nature may be due to faulty construction originally, or to the handle of the cock having been over-strained, and the neck twisted. Whether the passages in the plugs are fair and clear can, however, be verified in a few minutes. As an illustration, the water cock D, Figure 6, Plate II, can be verified by blowing through E with B shut and then moving the handle of D to one side until it is just closed, and then to the other side until it is again just closed; the proper working position of the handle is about equally distant from each of the above positions. The other cocks can be verified in the same manner.

Plate 2.

Fig 6.



Another serious casualty occurred through the handle of the cock A, Figure 3, having been twisted from its original position relatively to the orifice of the cock, resulting in the cock being shut when apparently open.

When a water-gauge, that is clear in all its parts, has been thoroughly blown through, the water in the glass rises above the level at which it formerly stood, immediately the drain cock E is closed, but if left undisturbed for a time it gradually falls to its former position. The amount of rise which occurs on these occasions depends chiefly on the temperature of the contents of the boiler and on the length of the pipes by which column Y is connected top and bottom to the boiler, but in cases where the gauge is of the description illustrated in Figures 3, 4 and 5, it amounts in high pressure boilers to about 4 inches, while the time occupied by the water in returning to its former level ranges from 30 to 40 minutes. The cause of this rise is twofold, namely (*a*) the displacement of the comparatively cold water in pipe H by hotter and proportionately lighter water from the boiler, and (*b*) a slight condensation of the steam and a corresponding fractional reduction of pressure in pipe I. The cause of the gradual subsidence of the water in the glass to its former level is also of a dual character, namely, (*a*) the cooling of the water in pipe H, and (*b*) the diminution in the condensation of steam in pipe I owing to the collection therein of air released from the steam condensed.

These results will, however, be somewhat modified if the water in the boiler is of higher density than in pipe H, and this will nearly always be the case owing to the condensation of the steam in the glass and upper fittings of the water gauge, causing the water in the lower part to be fresher than that in the boiler.

The Examiner should impress upon candidates the necessity for periodically blowing through the water-gauge on each boiler (no matter what the form may be) in a systematic and thorough manner, and, in cases where a boiler is fitted with two water-gauges, of keeping both in constant use; finally, he should further impress upon them the necessity for keeping the water-gauges well-lighted, clean, and in all respects efficient.

APPENDIX G.

(SEE RULE 33.)

Examination of Masters and Mates in Steam.

These examinations are provided for the purpose of giving Masters and Mates who are possessed of Certificates of Competency an opportunity of undergoing a voluntary examination as to their practical knowledge of the use and working of the steam engine. The endorsement of a Master's or Mate's Certificate for "Steam" does not, however, imply that he is qualified to perform the duties of an Engineer.

The examination is open to any person who holds a Certificate of any grade in the Foreign or Home trade, or as Master of his own pleasure yacht.

Applicants should fill up the form of application, form Exn. 2, at the Port Office, pay the fee of Rs. 20, and deposit their Certificates and testimonials with the Examiners, who will inform them when and where to attend to be examined. The usual testimonials for sobriety and good conduct for at least the last 18 months preceding the date of application to be examined must be produced, and at least a week's notice of the applicant's intention to sit for examination should be given.

If the candidate passes, forms Exn. 15 and Exn. 2, together with a written report of the examination and the candidate's Certificate, should be sent to the Chief Examiner of Engineers. The words "Certified to have passed in Steam," with the date and place of examination, will be entered on the Certificate and its counterpart, and the Certificate will be sent by the Port Officer to the Superintendent of the Mercantile Marine Office of the port named in the form Exn. 2, and will be delivered to the candidate in the usual manner.

If the candidate fails to pass, his Certificate will be returned to him at once, but he may not present himself for re-examination until the expiration of three months from the date of failure.

The examination is for the most part *viva voce*, and extends to a general knowledge of the practical use of coal and oil fuel, the working of steam engines (including turbines) and boilers, and of the various valves, fittings, and pieces of machinery connected with them, and of the way in which electric lighting is carried out on board ship.

Candidates must—

(*a*) Have a thorough grasp of the construction of the steam engine and boiler, to enable them to understand the nature and importance of any defect which may be reported to them by the Chief Engineer.

(*b*) Know the names and understand the uses of the various parts of engines and boilers, and their connecting pipes, valves, cocks, etc.

(*c*) Have a knowledge of the strength of materials, of the principal repairs required in connection with engines, boilers and pipes, and how these repairs are accomplished.

(*d*) Be able to form an independent opinion as to a break-down, and the consequent propriety or impropriety of proceeding under steam with temporarily repaired or defective machinery.

(*e*) Understand how to estimate approximately the reduction of fuel required for reduced speed, and be able to satisfy themselves as to the sufficiency of the coal or other fuel on board for the voyage.

(*f*) Have an intelligent grasp of the general run of pipes and connections in the engine-room, the working of cocks, the opening and closing of cocks and valves, and know how mistakes of importance may be made and how best to guard against such mistakes.

(*g*) Be capable of being left in charge of the feeding of a set of boilers, understand the working of the water gauge, and be able to guard against being misled by false indications of the gauge glass.

(*h*) Understand the operations of blowing down and surfacing, the reasons for such practices and the danger which may result from the neglect of them in certain circumstances.

A Master or Mate presenting himself for examination in Steam must be understood to have made up for his want of practical experience by reading about the steam engine. He ought, therefore, to show that he intelligently understands the rationale of its action. Under this head he should be able to state approximately the quantity of heat required in the formation of steam, the relation of "latent" heat to "sensible" heat, how much steam can be raised by the combustion of one pound of fuel, what horse-power measure is, what indicated horse-power is, what is the action of the slide valve, the course of the steam through the engine, the advantage of working expansively, and how the expansive action is shown by the indicator diagram.

He should know the uses of the various parts of the engines and dynamos used for electric lighting, and how they and the cables are fitted in the hull; how wires are jointed, insulated and cased; why it is desirable that they should be led along places which are dry and accessible; what "short circuiting" is and what are the causes which produce it; what is its danger in coal bunkers and petroleum carrying steamers; what are the uses of switches and cut-outs, and why it is so important to prevent short circuiting taking place.

Candidates will be required to give written answers to sixteen out of twenty questions in Engineering Knowledge. These questions will not be difficult, theoretical, or book questions, but such as any man of ordinary capacity who has a fair amount of practical knowledge of the use and working of the steam engine ought to answer.

Examiners will require all candidates to fill up a form Exn. 15*b* (*see* Appendix B), and they will forward it to the Chief Examiner of Engineers with the report of the examination.

If a candidate refers to any book, paper or memorandum, or obtains information from another candidate or any other person during the examination, he will be treated as having failed, will forfeit his fee, and will be excluded from further examination for such period as the Government may determine.

The Examiners will report, in the case of failure, the nature of the question or questions that decided the failure, or the point in the management of the engines or boilers in which the candidate was deficient.

Applicants for the voluntary examination need not necessarily have served on board steamships; all that is required is that they shall have a practical knowledge of the use and working of the steam engine.

Practical knowledge is best gained in the engine-room; and the examination of an officer who does not produce official evidence of service in steamships, and of experience of engines, must necessarily be more searching than in the case of one who produces evidence of such service and experience.

The answers to the questions in Engineering Knowledge are frequently given by candidates as learned by rote from a book. Candidates should, therefore, be asked such *viva voce* questions as will necessitate answers in different words, so as to discover whether they have the root of the matter in them.

A large part of the *viva voce* examination should be conducted on board a steamer, preferably one with which the candidate is unacquainted. He should be told to look about and try to find out the arrangement of the machinery without assistance, and the Examiner should be in the engine-room to see that this independent examination is properly carried out. When the candidate reports that he thinks he knows the arrangement the Examiner will question him on the uses of the parts, get him to point out the different cylinders, pumps, valves, condenser, etc.; also the dynamo, its field magnets, armature, commutators, brushes, cables, etc. The candidate must show that he understands the run of the pipes in the bilges, not necessarily that he has gone over every one of them, but he ought to be directed to trace, at least, one important range of pipes, and thoroughly to satisfy the Examiner that he could be safely trusted to manipulate the valves or cocks in connection therewith. It will not often be practicable for the candidate actually to work engines under steam, but he must satisfy the Examiner that he knows how to do so, and that he is aware of the precautions to be taken in regard to water in the cylinders, etc. It is most important that a candidate should show that, in the event of an accident depriving him of the assistance of Engineers, he knows what to do to take his vessel safely to an anchorage, or to stop the engines and proceed under sail alone.

The examination of a Mate in steam is the same as that of a Master. The knowledge required has no reference to the Mate's position.

A Mate may be examined, but such examination implies that the Mate may one day be a Master, when the possession of the knowledge will, possibly, be an advantage to him in the discharge of his duties.

The admission to this class is restricted to students (male and female) who are natives of, or whose parents are domiciled in, the area within the territorial limits of the Calcutta University, and the Provinces of Bihar and Orissa, Assam and Central Province and those who come out of the Dacca or the Rangoon University as provided for in rule 5.

(*b*) "Military Class" (only students of European or Eurasian parentage are admitted to this class). (*See* separate Prospectus for Military students.)

The admission to this class is regulated by the Director-General, Indian Medical Service.

2. The minimum preliminary qualification for admission to the—

(*a*) "Regular Class" is the Pass certificate of the I. Sc. Examination of the Calcutta University with Physics and Chemistry or any Examination equivalent to it.

3. The session commences on the 15th June.

4. All new students must apply for admission to the Principal, Medical College, Calcutta, in the prescribed form available in this office, on or before the 25th May, except in the case of Biharis, Uriyas, Chota Nagpuris and Assamese students, who should apply to the Inspectors-General of Civil Hospitals of their respective provinces for admission within such date as the latter may prescribe. Students who come out of the Dacca and the Rangoon Universities and the candidates from the Central Provinces should apply to the Director of Public Instruction of the respective Provinces.

Selected candidates must pay the following fees within the time prescribed by the Principal, failing which their names will be struck off the selected list :—

	Rs.	A.
Admission fee	20	0
Fees for Summer term	62	8
Athletic Club fee	2	0
Total ...	84	8

5. The number of Regular students to be admitted each year is generally 120, but the Principal may, at his discretion, increase or decrease this number. Preference for admission will usually be given to candidates who have superior qualifications, but the final selection lies entirely with the Principal.

One-fourth of the total number to be admitted shall be Muhammadans. Twelve candidates will be nominated by the Inspector-General of Civil Hospitals of Bihar and Orissa, one by the Government of Central Provinces and six candidates by the Inspector-General of Civil Hospitals of Assam, six candidates of the Dacca University by the Director of Public Instruction, Bengal, and two of the Rangoon University by the Director of Public Instruction, Burma. These candidates must possess the qualifications mentioned in rule 2 (*a*). In addition, the Bihar and Orissa Government will nominate six scholars, who must have passed the I. Sc. Examination with Physics and Chemistry. These nominations must reach the Principal, Medical College, Calcutta, before the 10th June in each year, failing which the Principal will fill up vacancies with local candidates.

6. (*a*) Female students will be admitted to the College provided they possess the requisite preliminary qualification, and provided there is a vacancy in the Surnomoyee Hostel in which all female students must reside.

(*b*) Female students belonging to provinces other than Bengal will have to pay rents for their seats in the Surnomoyee Hostel.

7. Failed students must apply for admission and pay fee within a week from the date of the publication of their results, otherwise their prior claim lapses.

8. All Regular students must pay an annual fee of Rs. 125 in two instalments, viz., Rs. 62-8 for the Summer term and Rs. 62-8 for the Winter term. They must also pay the annual athletic club fee of Rs. 2 along with their fees for Summer term. Fees once paid cannot be refunded.

9. The fees for each term are to be paid in one instalment. Except in the case of new students, the fees for Summer term are due on the 15th June and those for the Winter term on the 1st November, and must be paid on those dates or on such subsequent dates as the Principal may direct, after which a daily fine of annas 4 will be levied along with the fee in each case of default,

10. Female students are not liable to pay the athletic club fee.

11. Students relegated to a further course of study after their failure at the Preliminary Scientific M. B. and at the First M. B. Examinations shall pay Rs. 80 for the whole session in one instalment within the time prescribed above.

12. Students who fail at the Final M. B. Examination shall pay fees for the whole session at the following rates in one instalment by the 1st June :—

	Rs.
For one subject	25
For two subjects	50
For three or more subjects	75

13. Students taking up subjects outside the curriculum of the year in which they are studying shall pay Rs. 30 for each subject, including lectures and practical classes.

14. The fees for Casual students or for certificates issued to Regular students leaving the College before completing their study, or for those issued to Military students, shall be Rs. 40 per each course of lectures and practical classes and Rs. 30 for every three months of hospital practice.

15. In calculating the sum to be paid under rule 14 by a Regular student, the amount of College fees paid by him, or in the case of a student enjoying a stipendiary scholarship and free tuition, the amount which would have been paid by him had he been a paying student shall be deducted.

16. The fees payable by a Muhammadan student requiring certificates in the same way will be calculated on the same principle, *i.e.*, he will be allowed a deduction for the full annual fee, half of which has been paid by himself and half by the Mohsin Fund.

17. Students of the Military class requiring certificates in the same way will be required to pay the rate of fees laid down in paragragh 14 for the full curriculum or for such portion as they have attended. No deduction will be made in this case as they are not free students in the sense in which that terms is defined in Bengal Government Resolution (Education) No. 601 of the 7th December 1880.

18. The fee for post-graduate students undergoing a course of training in the Pathological, Bacteriological, Physiological or Chemical Laboratory is Rs. 90 for a period not exceeding six months.

19. Holders of scholarships, awarded by the Government of Bengal are not required to pay the annual fee of Rs. 125 for the year in which they hold such scholarships. (*3*) Where any officer other than the Collector proposes to examine under sub-section (*2*) any record or account containing the description or formulæ of any trade process, the owner of

CALCUTTA, *the 27th April 1923.*

CHAS. A. BENTLEY, *Director of Public Health, Bengal.*

Monthly Weather and Crop Report of Bengal for March 1923.

I. **Character of the season.**—The month continued practically dry up till the third week, but ended with light general rainfall. The total rainfall was markedly in defect of the normal. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—The rainfall in the latter part of February enabled field operations for autumn paddy and jute to continue. The harvesting of spring crops and cutting and pressing of sugarcane were also greatly advanced. Rainfall was, however, again deficient throughout the Presidency.

III. **State of standing crops.**—The condition of summer paddy and other standing crops was improved to some extent by the rainfall in the latter part of the month.

IV. **Prospects and probable outturn.**—The prospects of *rabi* crops and sugarcane were reported to be fairly favourable. The outturn of *rabi* crops for the province is estimated at 79 per cent. of the normal.

V. **Damage to standing crops.**—Some damage to winter *til* by hailstorm was reported from Khulna.

VI. **Condition of agricultural stock.**—The condition of live-stock was reported to be generally fair. Stray cases of cattle disease were reported from nine districts.

VII. **Failure of pasturage and fodder.**—Excepting from parts of Dacca and Noakhali, no report of scarcity of fodder was received from any part of the province.

VIII. **Prices of food-grains.**—During the second fortnight of the month the prices of common rice of the cheapest quality rose in six, districts, fell in six, and remained stationary in the rest of the province. The prices varied from 9 seers at Dinajpur to 6¼ seers at Darjeeling.

IX. **Condition of agricultural people.**—The condition of the agricultural population was reported to be fair on the whole. Test relief works continued in the flood-affected tracts of Rajshahi.

Students who come out of the Dacca and the Rangoon Universities and the candidates from the Central Provinces should apply to the Director of Public Instruction of the respective Provinces.

Selected candidates must pay the following fees within the time prescribed by the Principal, failing which their names will be struck off the selected list :—

	Rs.	A.
Admission fee	20	0
Fees for Summer term	62	8
Athletic Club fee	2	0
Total ...	84	8

5. The number of Regular students to be admitted each year is generally 120, but the Principal may, at his discretion, increase or decrease this number. Preference for admission will usually be given to candidates who have superior qualifications, but the final selection lies entirely with the Principal.

One-fourth of the total number to be admitted shall be Muhammadans. Twelve candidates will be nominated by the Inspector-General of Civil Hospitals of Bihar and Orissa, one by the Government of Central Provinces and six candidates by the Inspector-General of Civil Hospitals of Assam, six candidates of the Dacca University by the Director of Public Instruction, Bengal, and two of the Rangoon University by the Director of Public Instruction, Burma. These candidates must possess the qualifications mentioned in rule 2 (*a*). In addition, the Bihar and Orissa Government will nominate six scholars, who must have passed the I. Sc. Examination with Physics and Chemistry. These nominations must reach the Principal, Medical College, Calcutta, before the 10th June in each year, failing which the Principal will fill up vacancies with local candidates.

6. (*a*) Female students will be admitted to the College provided they possess the requisite preliminary qualification, and provided there is a vacancy in the Surnomoyee Hostel in which all female students must reside.

(*b*) Female students belonging to provinces other than Bengal will have to pay rents for their seats in the Surnomoyee Hostel.

7. Failed students must apply for admission and pay fee within a week from the date of the publication of their results, otherwise their prior claim lapses.

8. All Regular students must pay an annual fee of Rs. 125 in two instalments, viz., Rs. 62-8 for the Summer term and Rs. 62-8 for the Winter term. They must also pay the annual athletic club fee of Rs. 2 along with their fees for Summer term. Fees once paid cannot be refunded.

9. The fees for each term are to be paid in one instalment. Except in the case of new students, the fees for Summer term are due on the 15th June and those for the Winter term on the 1st November, and must be paid on those dates or on such subsequent dates as the Principal may direct, after which a daily fine of annas 4 will be levied along with the fee in each case of default.

10. Female students are not liable to pay the athletic club fee.

15. In calculating the sum to be paid under rule 14 by a Regular student, the amount of College fees paid by him, or in the case of a student enjoying a stipendiary scholarship and free tuition, the amount which would have been paid by him had he been a paying student shall be deducted.

16. The fees payable by a Muhammadan student requiring certificates in the same way will be calculated on the same principle, *i.e.*, he will be allowed a deduction for the full annual fee, half of which has been paid by himself and half by the Mohsin Fund.

17. Students of the Military class requiring certificates in the same way will be required to pay the rate of fees laid down in paragragh 14 for the full curriculum or for such portion as they have attended. No deduction will be made in this case as they are not free students in the sense in which that terms is defined in Bengal Government Resolution (Education) No. 601 of the 7th December 1880.

18. The fee for post-graduate students undergoing a course of training in the Pathological, Bacteriological, Physiological or Chemical Laboratory is Rs. 90 for a period not exceeding six months.

19. Holders of scholarships, awarded by the Government of Bengal are not required to pay the annual fee of Rs. 125 for the year in which they hold such scholarships. 20. The following are the curricula of the College :—

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 2nd May 1923.

Summary.—The rainfall in most parts of North Bengal was generally light to moderate, while in East Bengal it was but light and scattered. Elsewhere the fall was practically nil. Rain is badly needed for jute and paddy sowings, especially in the Western districts. The prospects of standing crops are generally satisfactory in East and North Bengal, while it is only fair in West Bengal. The average price of common rice for the province has risen by about 0·37 per cent. as compared with that of the previous week. The total number of persons employed in test-relief works in parts of Rajshahi from the 16th to the 30th April was 966.

Twelve candidates will be nominated by the Inspector-General of Civil Hospitals of Bihar and Orissa, one by the Government of Central Provinces and six candidates by the Inspector-General of Civil Hospitals of Assam, six candidates of the Dacca University by the Director of Public Instruction, Bengal, and two of the Rangoon University by the Director of Public Instruction, Burma. These nominations must reach the Principal, Medical College, Calcutta, before the 10th June in each year, failing which the Principal will fill up vacancies with local candidates.

6. (*a*) Female students will be admitted to the College provided they possess the requisite preliminary qualification, and provided there is a vacancy in the Surnomoyee Hostel in which all female students must reside.
